

ShadeTech[®] Battery Motors for roller blinds

Re-charged by solar power. The ultimate environmentally friendly solution.

Tubular battery motor concealed inside roller tube.

Solar panel mounted close to glass keeps battery fully charged. Panel does not require bright sunlight, and works equally well during winter months.

Provision for battery to be re-charged by mains power if required.

Can be retro fitted to existing ShadeTech[®] RBL roller blinds.

Maximum size: 3000mm x 3000mm

Motor is guaranteed for 5 years, battery for 1 year.

Remote control hand held or wall mounted switch. Options of multiple blinds being controlled together or individually.

Important Safety Note: Motorised roller blinds are deemed "safe by design" by BS EN 13120 child safety requirements.
