Special recommendations

Knitted textiles differ from woven textiles in terms of their performance and construction. As Rocket is a warp knitted textile, we do not recommend any sewing.

To adjust the length or the width of the textile, simply cut it along the meshes. Thanks to the construction of the textile it will not fray. This also applies if the textile stretches after installation.

Use a pleating tape in the top.

If more pieces of textile are to be installed next to each other, we recommend making a 4 – 6 cm loose overlap instead of sewing them together.
