

Basic external venetian blind

The all-rounder

Der SonnenLichtManager

Basic external venetian blinds can be very easily integrated into virtually any facade. Various colours and slat geometries allow full design freedom and individualised facade planning.

Features

max. width*	5,000 mm

*depending on type and equipment

The benefits for you

- Versatile applications
- Rolled beads increase slat stability
- Special design of dim-out slats allows rooms to be dimmed
- Flat slats provide a great view to the outside

Brilliant extras

- SenSigna: safe early warning system
- Minimax guide rails: slender appearance
- ProVisio: improved visual privacy combined with an optimised view out
- Corner joint for all-glass corners: unimpeded view
- STM: super-fast terrace motor
- slowturn: precise slat positioning
