

Awning window system with easyZIP guidance

Perfectly fitting sun shading system

Der SonnenLichtManager

There is an easy way! With the new awning window systems with easyZIP guidance, you have planning freedom. The awning is perfectly integrated into exterior insulation and finish systems and, thanks to the cover panels embedded in plaster and guide rails, a harmonious feel is achieved. You can decide if the lateral guidance should be another visible design element or if you want to enjoy the convenience of the easyZIP guidance.

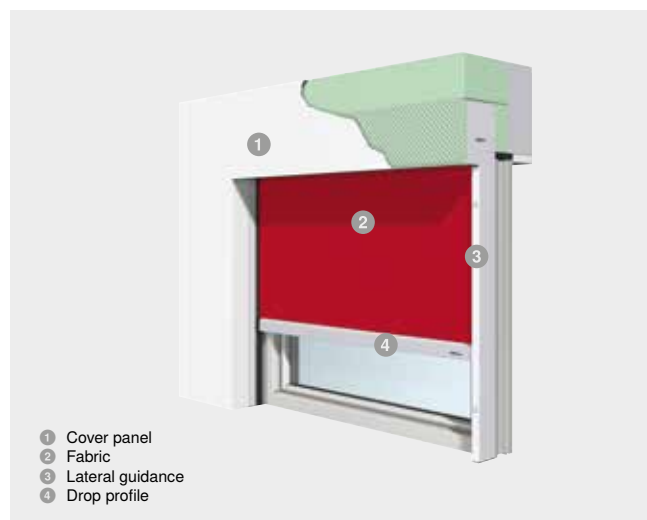

Features

*Depending on type and equipment

The benefits for you

- Unobtrusive integration in the facade with completely plastered cover panels and guide profiles
- No need for additional cover panel fixation
- Thermal bridges are prevented
- Drop profile retracts completely into the cover panel
- High wind stability up to a maximum wind speed of 150 km/h
- No incidence of light between guide rail and sun shading product
- The electronic special drive reacts sensitively to obstructions and wind, guaranteeing maximum fabric protection

Brilliant extras

- Integrated fall protection VisioNeo
